

(Floor Standing Units)

(Flexi Units)

(Wall Mounted Units)

SUPERIOR CONTROL

Indoor Unit Quiet Operation Function. Sound levels are reduced by 2-3 decibels (dB) from the low fan speed for quieter heating and cooling.

Outdoor Unit Quiet Operation Function. Outdoor unit sound levels can be reduced by 3dB for times when quieter operation is needed.

Intelligent Eye. This is an infrared sensor with the ability to sense movement in the room. When you are in the room, the air conditioner operates normally. If you leave the room for more than 20 minutes the air conditioner automatically changes to an energy-saving operation.

ECONOMICAL

Econo Mode. Controls the upper limit of frequency, reducing power consumption. This saves energy and reduces the load on the electrical circuit when multiple electrical devices are used simultaneously.

Night Set Mode. Through the use of the 'Timer-OFF Circuit', the preset room temperature gently rises in cooling or falls in heating before the unit stops. This energy-saving feature allows you to sleep comfortably without feeling a sudden change in the room temperature, while at the same time saving energy.

HEALTHY AND CLEAN

Mould-Proof Operation. This operation automatically runs the fan on an ultra low speed for one hour when cooling or dry operation is stopped. This prevents the generation of mould and mould odours inside the indoor unit.

Air-Purifying Filter. Traps microscopic particles and decomposes odours to purify the air in your room.

CONVENIENT

24-Hour On/Off Timer. The timer can be preset to start and stop the air conditioner at any time within a 24-hour period. Once the times are set, the air conditioner can be operated for a period by simply pressing the ON or OFF timer buttons.

Weekly Timer. This function makes it easy to enter up to four settings per day for each day of the week. It not only allows you to program on and off time, but also the desired temperature.

EASY TO OPERATE

Self-Diagnosis. In the event that a problem develops with the unit, malfunction codes can be displayed on the liquid crystal panel of the remote control for fast and easy fault diagnosis.

REMOTE CONTROLLERS

NEWLY DEVELOPED WIRELESS REMOTE CONTROLLER

This new remote controller with a backlit liquid crystal display and luminescent control buttons, also features a built-in weekly time clock that can be programmed on or off to suit your personal lifestyle with up to four actions per day for each day of the week. This advanced controller not only allows you to program on and off time, but also the desired temperature. Furthermore, the copy function enables any daily program to be replicated on any other day or days as required.

Applicable to FVXS models, FTXS-H, FTXS-J and FTKS-J ranges.

LCD WIRELESS REMOTE CONTROLLER

This remote controller puts superior comfort at your fingertips. Frequently used buttons are instantly accessible while other buttons are under the cover of the remote. A large liquid crystal display panel makes it easy to read the settings and the On/Off button has a raised dot so that you can feel it in the dark.

Applicable to all models except FVXS models, FTXS-H, FTXS-J and FTKS-J ranges.
