Forms 90° Degree
Duct Elbows

*Compared to restricted or kinked flexible duct

Is your system installed right?

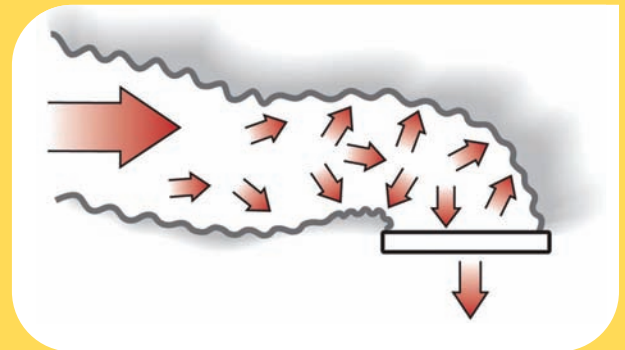

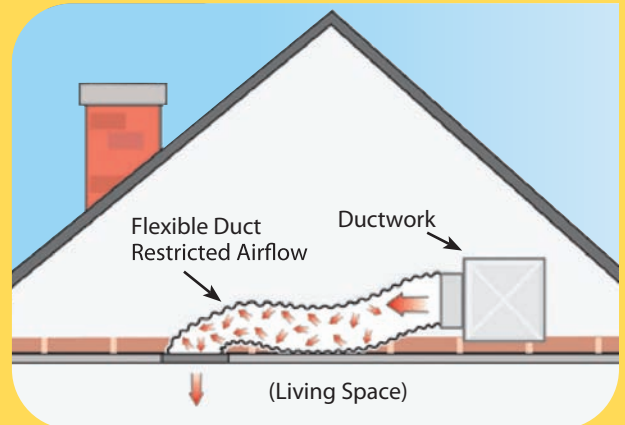

Install FlexRight™

Save Energy Install FlexRight!

FlexRight is a radius forming brace designed to quickly and easily form flexible duct into an energy efficient 90° elbow. FlexRight improves airflow and saves energy by eliminating kinks and restrictions common to flexible duct installations. Existing Homes – install FlexRight on existing flexible ducts to immediately improve airflow and save energy. New Construction – request and install FlexRight at all supply air registers.

X FlexWrong

Wasted Energy and High Power Bills

Heating and cooling systems account for up to 40% of the energy used in homes. A source of excessive energy consumption is restricted airflow caused by improperly installed and kinked flexible ducts (similar to the restricted water flow in a kinked garden hose). Restricted airflow causes A/C units to run longer cycles and use more energy, resulting in costly power bills.

FlexRight Features & Benefits

- ✓ Improves airflow up to 80% compared to restricted or kinked flexible duct
- ✓ Saves energy
- ✓ Adjustable design. One size fits all
- ✓ Retrofit – Install on new or existing flexible ducts
- ✓ Economical
- ✓ 100% recycled materials

Your Authorised Airconditioning Specialist

*Ductair provides a 20 year warranty for air-conditioning componentry it manufactures on complete systems, installed in residential roof space by qualified tradesperson, covering replacement and/or repair of faulty components, where manufacturing defects have caused a breakdown in materials excluding mechanical parts. Fault must be determined by original retailer/installer & approved by Ductair. Warranty does not cover 'Acts of God', consequential loss or owner misuse outside of normal use. 01909
