

# FREEDOM BAY

I N S E R T

Shown with brass door, blue metallic paint finish and 8" surround panels.

The Freedom Bay is proof that beauty and function really can be engineered to go hand in hand. At an emission rate of only 2.6 grams per hour, it is the cleanest burning large insert ever tested and approved by the EPA. Framed by hand-polished solid brass, the bay “windows” are actually side convection chambers that allow air to circulate around the huge firebox and return to the room heated. Because it’s flush mounted, the Freedom Bay includes a quiet, yet powerful blower (standard) to produce superior air flow. The Freedom Bay also comes with the choice of a solid brass, black painted or pewter door and trim, making this insert our most distinctive and elegant heater for larger homes.

Options: Black Door & Trim Kit, Brass Door & Trim Kit, Pewter Door & Trim Kit & Etched Glass

Emissions	Heating Capacity	Heat Output	Maximum Burn Time	Firebox Size	Maximum Log Size	Weight	Construction	Efficiency
2.5 g/Kg Per Hour	Up To 250 Sq. M.	74,300 BTUs/Hr.	12 Hours	.09 Cubic Meters	610 mm	213 Kg	9.5 to 6 mm Steel Plate	63.7%
