

WOOD AND GAS HEATING

Onyx Freestanding

WHY YOU SHOULD CHOOSE A EUREKA SOLITAIRE

Made in Australia - for Australia

All the charm of dancing flames on a cold winter's night, without the heat loss or inconvenience of conventional open fireplaces – that's what Eureka heaters offer you.

Extensive research into all aspects of woodheating, followed by stringent evaluation in Australian homes, has resulted in the comprehensive range of woodheaters you see before you in this brochure.

WOODHEATER RANGE

Aztec Freestanding

The Aztec Freestanding is a strong and robust large fan forced heater created for larger homes of up to 300 sq metres. It features the conventional efficient fire brick lined ash bed design. The Aztec also includes a **removable ash box** for easy cleaning, a feature unique to our range.

Onyx Freestanding

The Onyx freestanding unit is a large powerful heater, designed to heat a home of up to 300 sq metres. The features include a huge bay window, robust firebox with 8mm baffle plate, along with the stylish appearance of the Eureka range.

Emerald Mk 3 Freestanding

The Emerald Mk 3 freestanding is a mid sized heater designed to heat 220 sq metres. With its heavy duty fan and high performance coupled with its large bay view glass and streamlined sides, this heater is an excellent addition to the family home.

Miner Freestanding

The Miner's huge firebox along with its stylish contemporary finish makes this heater stand above the rest. Designed to heat 260 sq metres, this easy to operate heater with a deep fire chamber is sure to impress.

WOODHEATER RANGE

Opal Series 2 Freestanding

The Opal Series 2 woodheater is efficient, rugged and powerful. It is produced for the budget conscious buyer who wants maximum heating capacity for their dollar. The heater features a large door, a powerful three speed fan and a firebrick lined firebox.

Nugget Freestanding

The Eureka Nugget is a multi-purpose heater, usable for both heating and cooking. You can boil or simmer on either the front or back top shelf of the heater. This unit has the same low clearances of conventionally cased heaters. Fan option available.

Onyx Fireplace Insert

A strong and robust wood heater, the Onyx fireplace insert is easy to operate. Designed to heat 200 sq metres, with its single piece bay window, firebrick lined burn chamber and powerful three speed fan, along with its double fronted firebox, this is the insert to warm the family.

Opal Series 3 Fireplace Insert

The Opal Series 3 fireplace insert designed with its four sided surround will heat 160 sq metres. Installed off the floor in a Zero Clearance application or into a fireplace its a robust heater for the average Australian home.

WOODHEATER RANGE

Stockade Series 4 Insert

This large powerful wood heater, with a huge opening and viewing glass is designed to heat 240 sq metres. Brick lined and double rolled baffle, the Stockade Series 4 looks great in any application.

Garnet Series 2 Insert

The Garnet Series 2 insert is the largest flat glass unit in our range. Contemporary looking with an enormous burn chamber, the Garnet is designed to heat 280 sq metres.

* Requires a 175mm flue.

Woodstock

A variation of the popular Opal freestanding unit, but with the added feature of storage under the firebox. This stylish heater is designed to heat up to 180 sq metres.

Garnet Freestanding

Huge unit with powerful output up to 320 sq metres. Similar features to Opal and Miner units, but a larger version. The huge glass window allows optimum viewing, an 8mm baffle and firebrick lined firebox.

WOODHEATER RANGE

Sovereign Edwardian Mk2

- Double fronted firebox for pre-heated primary air
- Strong welded seam and folded 6mm firebox
- Deep ashbed
- Quiet and powerful 3 speed fan
- Firebrick lining to protect the firebox and retain heat for longer burning
- 8mm removeable baffle plate
- 5mm thick heat and shock resistant door glass
- Self cleaning door glass during normal burning

DIMENSIONS

	HEIGHT	WIDTH	DEPTH	WEIGHT	CAPACITY
Sovereign Edwardian Firebox	680mm	705mm	450mm	162kg	Up to 220 sq metres

Floor Protector Tray	870mm x 450mm (360mm in front of heater base) x 16mm	105mm	504mm	274mm	232mm

Zero Clearance option available

ZERO CLEARANCE CABINET

Create your own fireplace with the Zero Clearance multi-cased steel cabinet. The Zero Clearance Cabinet appliance requires only 12.5 mm clearance from combustibles on the back, sides and top. Plaster, timber paneling etc. can be placed directly against the top and the sides of the fascia of the appliance enabling a freedom of design. The ZC cabinet can accommodate all Eureka wood fired inserts including the Sovereign Edwardian Mk 2.

Easy Installation

1. Select location for the ZC cabinet to enable the flue assembly to go through the ceiling between the rafters.
2. Position the ZC cabinet as per the instruction book.
3. Build the outside frame to suit and complete the outer casing of flue assembly.
4. Fix outer panels.
5. Install your chosen Eureka insert.
6. The completed project.

Note: The ZC cabinet must be installed as per installation instructions.

SPECIFICATIONS

NOTE: The dimensions and clearances on this page are for reference only. Refer to the Owner's Manual for operation and exact specifications prior to installation.
